

SECTION I

UTAH EMPLOYERS, EMPLOYMENT AND WAGES, BY SIZE

The Utah Department of Workforce Services compiles quarterly employment and wage data for non-agricultural employers in Utah. Data are maintained at the establishment level, i.e., store, plant, or other type of permanent worksite facility. Since these establishments are assigned an industry and county code, their employment and wage data can be aggregated into common industry and county grouping for analysis purposes.

For the first calendar quarter of each year, establishment employment and wage data are additionally summarized into ten separate size classes. These ten classes or categories, which are based on March employment levels, are as follows; 0, 1-4, 5-9, 10-19, 20-49, 50-99, 100-249, 250-499, 500-999, and 1,000 and over. Since Utah employers are primarily small-sized establishments, the number of establishments in each size category varies inversely with the size class, i.e. the smaller size classes have the largest number of establishments. In fact, over one-half of Utah's establishments employ fewer than five workers and 99.2 percent employ fewer than 250 workers.

The distribution of employment within these ten size classes is different than the distribution of establishments. While over one-half of the establishments are in the two smallest size classes (employing 0-4 workers,) only 5.2 percent of non-agricultural employment is there.

The highest non-ag employment concentrations are actually found in the middle size classes with a large concentration also in the largest size class. The four middle size classes, employing 10-249 workers, contain 56.5 percent of non-agricultural employment, while only 27.4 percent of establishments are represented there.

In general, average monthly wage levels tend to correspond with increases in size class. The first two size classes break this pattern, however. This is primarily due to high concentrations of professional organizations in these small size classes which tend to pay higher than average salaries. These factors raise the average wage level for small firms.

1,000 & Over	126	351,597	2,556,638,946	2,445

1/ The number of firms is a count of employers. If an employer operates at multiple worksites, it is counted as one firm for purposes of this table.

2/ For the firms which had zero employment in March, there were wages paid during the quarter to employees that worked in January and/or February.

DEFINITIONS

Nonagricultural Employment: A calendar year average of the number of nonagricultural employees reported to the Utah Department of Workforce Services by employers subject to Utah's unemployment insurance laws, federal agencies in Utah subject to the Unemployment Compensation for Federal Employees (UCFE) program and other Utah nonagricultural employers not included under unemployment insurance. As a result of multiple job holding and payroll turnover, some workers are reported by more than one employer. Therefore, the count is not of persons but of jobs. Nonagricultural employment includes most corporation officials, executives, supervisory personnel and clerical workers. It excludes proprietors, self-employed, unpaid family workers who neither work nor received wages as a result of strikes or work stoppages, temporary layoffs or unpaid sick or vacation leave.

Establishments: Any firm, organization or division for which data are separately reported to the Utah Department of Workforce Services, i.e. individual physical facilities such as stores, plants, offices and other work sites.

Total Wages: All yearly remuneration paid to nonagricultural workers, including gross wages, commissions bonuses, cash value of meals, lodging, and other gratuities when furnished as payment for the job. Reimbursement for travel or other business expenditures are not included.

Average Monthly Wage: "Total Wages" divided by the number of employees on nonagricultural payrolls.
